

EN “LUCAS” MONG

781-535-9564 | mong.e@northeastern.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Northeastern University, Boston, MA

Expected December 2026

Master of Science in Cybersecurity | GPA: 4.0

- **Coursework:** Security Risk Management, Software Vulnerability, Computer System Security, Network Security, Cryptography

University of Massachusetts Boston, Boston, MA

May 2023

Bachelor of Arts, Double major in Criminology and Criminal Justice, Sociology | Summa Cum Laude

CERTIFICATIONS

CompTIA Security+ (Jan 2026) | ISC2 Certified in Cybersecurity (CC) (June 2025) | AWS Cloud Practitioner (In Progress)

TECHNICAL SKILLS

Security Monitoring & Detection: Splunk, Wazuh, Intrusion Detection, EDR, Nessus, Wireshark, Nmap

Offensive Security: Penetration Testing, Web Application Security (OWASP Top 10), Binary Exploitation, Burp Suite, Metasploit

Forensics & Incident Response: Digital & Network Forensics, Malware Analysis, Autopsy, Kali Linux, IR (NIST SP 800-61)

Cloud & Containers: AWS (IAM, CloudTrail, VPC), GCP (IAM, conditional access), Docker, Kubernetes (RBAC, cert-based auth)

Endpoint & Device Management: Microsoft Intune, Citrix (VDA), Patch My PC, MDM/MAM, OS patch compliance

Scripting & Automation: Python, Bash, PowerShell, SQL, C | Security workflow automation, alert tuning, process optimization

Networks & Cryptography: Encryption, PKI, Authentication, Firewalls & Perimeter Security, iptables, SELinux, Zero Trust

Frameworks & Standards: NIST RMF / CSF / SP 800-53 / 800-61, MITRE ATT&CK, ISO 27001, HIPAA

PROFESSIONAL EXPERIENCE

American Family Insurance | *Endpoint Engineer Intern* | Boston, MA

May 2026 – Present

- Mitigated endpoint vulnerabilities at scale by identifying recurring patterns across the fleet and authoring PowerShell remediation scripts; automated third-party application patching with Patch My PC.
- Performed operating-system analysis across Windows and macOS endpoints in Microsoft Intune, enforcing update policies and OS patch compliance fleet-wide.
- Maintained VDI health by updating Citrix VDA and Workspace agents and running scheduled patching cycles for non-persistent VDIs; monitored session health and inventory in Citrix Studio for enterprise-wide availability.

Adams Family Dental | *IT Security & Insurance Coordinator* | Quincy, MA

Sep 2024 – May 2026

- Monitored for intrusions and assessed network security configurations with Python and Linux, reducing attack surface by 40%.
- Automated security workflows in Python and Bash for access control and alert handling, improving efficiency by 60%.
- Performed Nessus vulnerability scans and Linux hardening aligned with NIST, maintaining HIPAA compliance.

Children’s Advocacy Center of Suffolk County | *Community Outreach Coordinator* | Boston, MA

Jun 2023 - Sep 2024

- Delivered cybersecurity awareness training (phishing, safe browsing, password hygiene) to 1,000+ community members; led cross-functional outreach that raised community awareness by 80%.

Homeland Security Investigations | *Global Trade Investigation Group (GTIG) Intern* | Boston, MA

Sep 2022 - Dec 2022

- Conducted digital and network forensics on wiretap evidence, delivering actionable intelligence to inter-agency teams.
- Maintained chain of custody for 500+ pieces of digital evidence, supporting resolution of 10 drug-smuggling cases.

RELEVANT PROJECTS

2nd Place, Graduate Division — Collegiate Social Engineering Competition (2026) | Team Layer 8

- Executed OSINT and live vishing (improv + AI-generated voice via Eleven Labs) against a simulated target, surfacing plaintext credentials, exposed WordPress REST API endpoints, and absent caller identity verification.

Web Application Penetration Testing

- Assessed a target web application for OWASP Top 10 flaws (IDOR, SQL injection, XSS, CSRF) using Burp Suite; documented findings and remediation guidance.

Binary Exploitation & Incident Response

- Developed stack-based buffer-overflow exploits in C, bypassing stack canaries and ASLR; authored IR playbooks for cloud-misconfiguration and rootkit scenarios aligned with NIST SP 800-61 and MITRE ATT&CK.
